Loop (while loop)

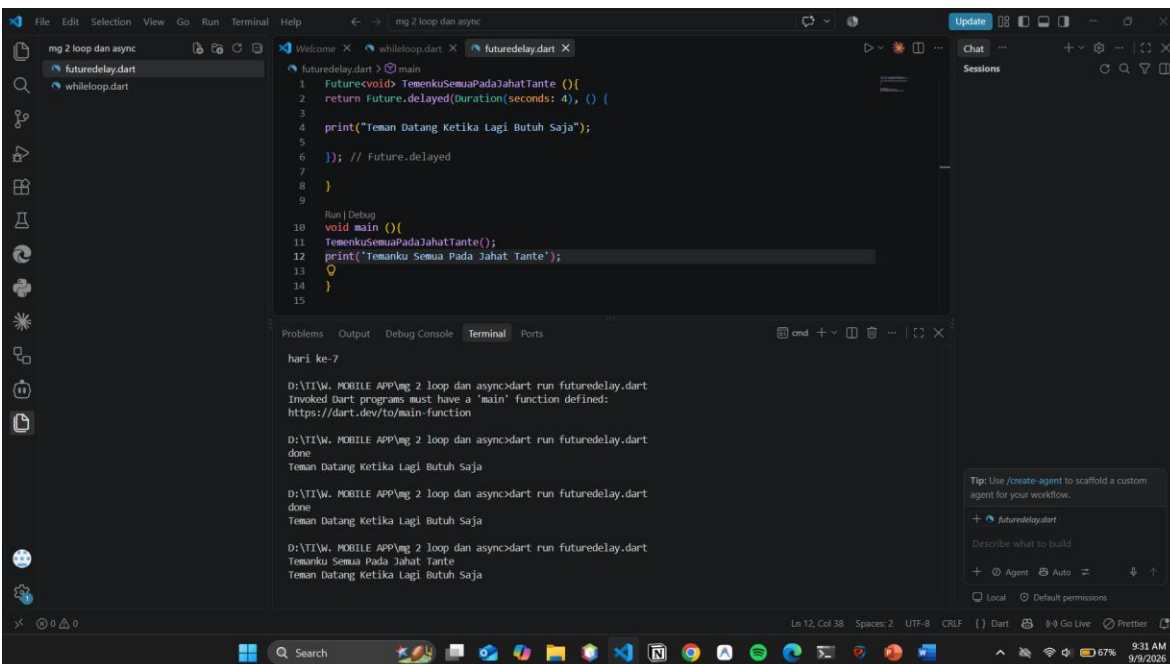

The screenshot shows the Visual Studio Code editor with a Dart file named `whileloop.dart`. The code implements a `while` loop that prints "hari ke-1" through "hari ke-7". The terminal output shows the execution of the program, displaying the sequence of days. The file explorer on the left shows the project structure, and the right sidebar contains a chat window and a tip about using the create-agent tool.

```
1 void main () {  
2   var counter = 1;  
3  
4   while (counter <= 7){  
5  
6     print('hari ke-$counter');  
7  
8     counter++;  
9  
10  }  
11  
12 }
```

```
hari ke-3  
hari ke-4  
hari ke-5  
hari ke-6  
hari ke-7  
  
D:\TI\W. MOBILE APP\mg 2 loop dan async>dart run whileloop.dart  
hari ke-1  
hari ke-2  
hari ke-3  
hari ke-4  
hari ke-5  
hari ke-6  
hari ke-7  
  
D:\TI\W. MOBILE APP\mg 2 loop dan async>
```

Async (future delay)

The screenshot shows the Visual Studio Code editor with a Dart file named `futuredelay.dart`. The code uses `Future.delayed` to create a delay before printing "Teman Datang Ketika Lagi Butuh Saja". The terminal output shows the execution of the program, displaying the sequence of days and the delayed message. The file explorer on the left shows the project structure, and the right sidebar contains a chat window and a tip about using the create-agent tool.

```
1 Future<void> TemenkuSemuaPadaJahatTante () {  
2   return Future.delayed(Duration(seconds: 4), () {  
3  
4     print("Teman Datang Ketika Lagi Butuh Saja");  
5  
6   }); // Future.delayed  
7  
8 }  
9  
10 void main () {  
11   TemenkuSemuaPadaJahatTante();  
12   print("Temanku Semua Pada Jahat Tante");  
13 }  
14  
15 }
```

```
hari ke-7  
  
D:\TI\W. MOBILE APP\mg 2 loop dan async>dart run futuredelay.dart  
Invoked Dart programs must have a 'main' function defined:  
https://dart.dev/to/main-function  
  
D:\TI\W. MOBILE APP\mg 2 loop dan async>dart run futuredelay.dart  
done  
Teman Datang Ketika Lagi Butuh Saja  
  
D:\TI\W. MOBILE APP\mg 2 loop dan async>dart run futuredelay.dart  
done  
Teman Datang Ketika Lagi Butuh Saja  
  
D:\TI\W. MOBILE APP\mg 2 loop dan async>dart run futuredelay.dart  
Temanku Semua Pada Jahat Tante  
Teman Datang Ketika Lagi Butuh Saja
```
